

# Data storage cost for collaboration services can get expensive. That is why we developed **ProjectShare.com Xtends DNA Server**. After all, why should you pay anyone for data that you could store?

Your web server with Xtends DNA

ProjectShare.com Application Server

**Unlimited Storage Potential**

**Quiet upgrades  
Fast response**

**Seamless, Unified Solution**

## Xtends Facts and Benefits

- Secure and smart data storage
- Low cost and no associated storage fees
- Unlimited storage potential
- Quiet, seamless upgrades
- Hassle free maintenance
- Utilizes safe Http and XML methods
- Works great with firewall and proxy servers

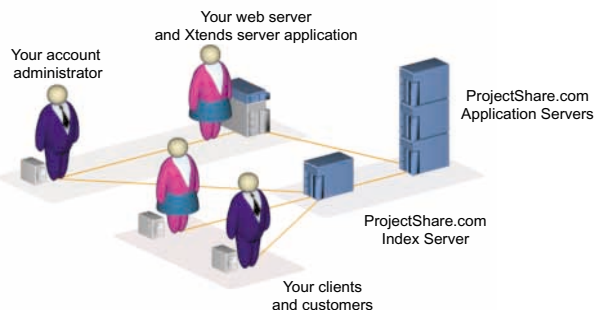

## The rules have changed.

Xtends unequivocally leaves the competition in the dust. Your server host the collaboration data and our server delivers the collaboration application, together they seamlessly deliver a smart effective solution. Xtends uses simple Http and XML technologies and positions itself to be truly maintenance free.

Our hybrid solution has captured the attention of companies large and small. We have broken the old subscription based collaboration methods by effectively placing data where it belongs, with you.

**With Xtends, we manage the application, you store the data!**
